

Safeguarding Managing Risk

TASK

Work through the following scenario;

You have a mixed session with children aged between 5 – 12 years, they are mixed gender and ability, there are several different activities available place around the room.

At one end you have an inflatable, which is always very popular.

- What do you need to consider before the children arrive?
- How are staff going to manage the play space ensuring children are always adequately supervised?
- How will you ensure all children's needs are met?

TASK

Using the age group you work with in your setting, think of other scenarios which are appropriate to your area of work e.g. soft play and ball pool, woodwork bench and tools, cooking.

Apply the questions above and consider how you would manage the risk of activities you provide.
