

# Reflective Practice Team Meetings

Team meetings are an excellent opportunity to bring practitioners together for professional discussion.

Consider how you make the most of one another's ideas.

## **TASK**

Step 1 – Think of an idea you would like to implement. This can be an idea that you think of, or a task that has been previously agreed but not yet achieved. Task yourself with making the changes required.

Step 2 – Ask a member of the team to follow up your idea, review progress that has been made and the impact that is evident. At the next meeting, ask your colleague to reflect on how your idea has contributed to improving outcomes for children.
