# What is the Children & Young People's (CYP) Mental Health Triage & Navigation Service?

**CYP Mental Health Triage and Navigation is a service that helps young people in Leicester, Leicestershire & Rutland access the right non urgent mental health services for their needs.**

## What is mental health?

It is how we feel. We all have mental health all of the time, some days good, some days not so good. Everyone can feel a bit down sometimes, and although most of the time we can get the help we need from friends and family, sometimes we need a bit more support. This is where our service can help.

## How do I get help?

If you think you or your child or young person could benefit from support with mental health, please either:

### 1. Visit [MySelfReferral-LLR.nhs.uk](https://www.myselfreferral-llr.nhs.uk)

If you have mental health concerns, you may find helpful information and request support by clicking on the "Do Self Referral" button on the [MySelfReferral-LLR.nhs.uk](https://www.myselfreferral-llr.nhs.uk) website (except neurodevelopmental disorders, eating disorders or substance misuse. Please contact your GP Surgery to make an appointment to discuss these conditions).

### 2. Contact your GP

Your GP can make a referral into our service if this is right for your needs. A referral gives us the information we need to help us decide what kind of service would be most helpful to you.

## How do I get help if it's urgent?

If you or your child or young person have taken an overdose or are in imminent danger of physical harm, attend A&E or call 999.

You can now call NHS 111 and select option 2 for 24/7 access to crisis mental health support.

## What information will you share?

This is a confidential service provided by DHU Healthcare. We will normally only share your information if we refer you to CAMHS or the Early Intervention Service to make sure they have the right information to help them understand your needs. We will also let your GP or the person who referred you to our service know what we recommend for you.

## What happens next?

We won't call you, and we don't meet people face to face...you'll get a letter or text message from our service to let you know what will happen next.

This could be a referral to an NHS service, or we might tell you how you can access other types of help, such as free online counselling or through a voluntary organisation such as Tellmi. No one service is 'better' than another – they all provide support for different needs. We try hard to find the best service for you.

## What can I do while I am waiting to hear from you

We want to make sure you get the help you need, as fast as possible. There is information and free resources on our [MySelfReferral-LLR.nhs.uk](https://www.myselfreferral-llr.nhs.uk) website that might help while you wait.

## Will I always get a referral to CAMHS?

No. Our service will consider a range of services available to find the best service to meet your needs, as 6 out of 10 children and young people are helped quickly and without needing to wait for CAMHS.
